

GTS Retail is a modern, easy-to-use, multi-language point of sale system enabling you to serve customers quickly, while efficiently managing your business and inventory. It fully supports the selling and buying of currency products, including remittances and prepaid cards in retail branches whilst automating compliance and risk processes.

Retail
Branch point of sale system for travel money & precious metals

GTS is designed to be easily configured to the specific requirements of your business – including organisational structure, products, commercial practices (fees, commission, rate management etc.), customer categorisation and reporting. In high traffic locations, the market-leading Business Continuity Mode ensures that trading continues should Internet/network connectivity fail.

GTS Retail:

- Provides a fast and flexible deal capture process that frees the teller to engage with the customer and maximise the transaction value
- Increases revenues through prompts for up-selling and buy-back guarantees
- Fulfils orders for exotic currencies via third party suppliers
- Trades and tracks prepaid travel money cards with integration to card providers, such as MoneyGram & Western Union
- Supports inbound and outbound remittances with integration to money transfer operators
- Adheres to local audit and compliance requirements set by market regulators
- Supports centralised management of branch operations, including rates, stock, position, operational risk and reporting.

Centralised administration and reporting provide a clear view of performance and ensure that trading, AML, KYC and other business-specific rules are enforced.

The fully configurable rates board module allows you to display real-time exchange rates and electronic advertisements on LCD screens to maximise point-of-sale marketing opportunities. GTS Retail integrates with the GTS Mobile module to support smartphone/tablet currency orders and reservations across your branch network to create a seamless customer experience.

FEATURES & BENEFITS

- Buy and sell unlimited products, with easy configuration of new products, users and business rules
- Powerful, centralised inventory control, position management and reporting across the whole branch network
- Fully auditable user security by role, task and transaction value with approval override
- Offline capability to allow continued operations should network connectivity fail
- Comprehensive AML KYC and security controls with centralised view of customer and cashier activity
- Integration with GTS Cash Centre for order placement and stock replenishment
- Integration with GTS Mobile module for receiving 'reserve & collect' orders and fulfilment from branch inventory.

- Rate maintenance
- AML & KYC rules
- Transaction code/rules
- User access and roles configuration
- General ledger mapping

Technology & infrastructure

- Service Oriented Architecture (SOA) using Microsoft technology
- Web or local client deployment
- Offline capability
- Fully hosted option

About IMX Software

IMX Software has over 20 years' experience in delivering market-leading technology solutions to businesses in the banknote and precious metal trading, retail foreign exchange, and travel money markets. Our dedicated industry focus, knowledge and skills have enabled us to develop advanced, functionally-rich solutions designed to increase performance and profitability while reducing commercial risk and achieving greater compliance. From offices in the UK, Australia and South Africa we deliver solutions, business and technical expertise, and support to a global customer base. Our clients include international banks, national and multi-national bureau de change operators, travel agents, and logistics operators. Committed to delivering first-class technology solutions for our industry, we are proud to have been awarded Microsoft Gold Competency status for both our technical ability and our customer service.

About GTS

IMX Software's Global Trading System (GTS) is a suite of integrated software modules that increases operational efficiency and reduces costs and risk for businesses in the banknote and precious metal trading, retail currency exchange, and travel money markets.

The six configurable modules within GTS address the varying processing and control challenges of wholesale banknote trading, managing cash inventory and distribution workflow, running retail branches and bureau de change, and supporting online and mobile consumer ordering whilst monitoring business performance across your entire supply chain.

Available GTS Modules

- **GTS Wholesale:**
wholesale buying and selling of banknotes and precious metals
- **GTS Cash Centre:**
cash centre inventory management and distribution logistics
- **GTS Retail:**
point of sale solutions for retail outlets such as bureau de change
- **GTS E-commerce:**
online consumer order capture for travel money products
- **GTS Analytics:**
business performance analysis, management information and reporting
- **GTS Mobile:**
extends application modules to smartphones and tablets for increased user and marketing flexibility
